## JABRA GN1200 SERIES

CONNECT YOUR DESK PHONE TO ANY JABRA QD HEADSET

The Jabra GN1200 Series cord is the solution to the common problem of not being able to connect your headset and telephone. Even though most things have been standardized, the cord connecting the phone with the handset or headset is anything but standard as each telephone manufacturer has its own wiring code. Now, with the Jabra GN1200 Series universal "smart" cords, one cord will work with virtually any phone providing greater convenience.

### EASY TO DEPLOY

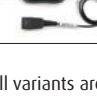

Jabra GN1200 Series audio processor cords make it possible to connect virtually any desk phone with Jabra's Quick Disconnect corded headsets. Even though the headset and desk phone may be plug-compatible, the wiring is determined by the individual telephone manufacturer. Jabra GN1200 Series cords feature eight separate wiring schemes - including three with built-in microphone amplification. Just connect the cord and the headset through the Quick Disconnect plug and flick the slider from one position to the next until a dial tone is heard. It's as simple as that!

### MICROPHONE AMPLIFICATION

Jabra GN1200 Series cords feature eight microphone volume settings to ensure that the volume of all outgoing calls is at the same user defined comfortable level.
