

AHSC-1000 IP-Based Core Controller

- Ultimate Authentication Performance
- Scalable
- Advanced Global Functionality based on peer-to-peer communication
- High Level Cyber Security

Key Features

Ultimate authentication performance

Supports up to 800,000 (1:1) & 400,000 (1:N) RFID card, 400,000 (1:N) BLE / NFC / Dynamic QR Code mobile credential, 100,000 (1:1) & 50,000 (1:N) fingerprint, 100,000 (1:1) & 50,000 (1:N) facial, 5,000 (1:1) & 3,000 (1:N) palm authentication in one single controller. Supports up to million-grade (1:1) authentication capacity with online backend authentication server.

Scalable

Supports up to 129 access points, with 32 AHDU-1460 door units and 258 readers with various authentication options including biometrics, RFID card and mobile credential authentication (Bluetooth / NFC / Dynamic QR Code). With advanced communication protocols, the AHDU-1000 supports up to 792 AHEB series IO expansion boards and 33 AHDU door units, ultimately supporting up to 12,801 inputs or outputs.

Innovative MQTT based communication protocol

MQTT is a lightweight communication protocol generally used by IoT devices. Its features make it an optimal solution for intelligent security systems, which enable the controller to communicate with more edge devices (Door Unit, reader, sensor, etc.) under the same network environment.

Threat Levels

Unlimited threat levels are used to adjust user access during lockdowns and lockouts instantaneously.

Advanced Communication

The serverless design enables the controller to operate independently. Peer-to-peer cross-controller linkage communication among controllers can be active while the Armatura-One server is unavailable. All preset linkages and global linkages can operate as usual.

Dual System Rom Protection Design

To offer the best operation stability, durability, and safety and tackle different kinds of situations, such as an improper upgrade, cyber attack, and malware infections that completely render the ROM to inoperable status. Armatura's controllers are built with a dual ROM design, one of the ROMs acts as a primary ROM for the system startup, and the second layer ROM acts as a "Recover" ROM. When the primary ROM happens to fail or malfunction, the second layer ROM will automatically take over on your next controller board startup.

Supervised Inputs

The AHSC-1000 controller is equipped with four state-monitoring inputs, which gradually avoids short circuit attacks. The AHSC-1000 controller can detect abnormal changes below 5% Ohms in the circuit and filter out all possible attacks. REX inputs and dedicated fire alarm inputs on the board are independently managed by isolated microchips to ensure these inputs can operate normally under various extreme and catastrophic situations, even if the motherboard does not function properly.

PoE

Power-over-Ethernet (PoE) 802.3at/ 9-24VDC from power sourcing equipment (PSE) according to IEEE PoE 802.3at standards.

3rd Party Integration

Supports BMS common communication protocols such as BACnet, Modbus, and OPC to integrate building management systems. Supports a range of reader protocols, including Armatura Explorer series reader, 3rd party biometric reader, 3rd party Wiegand / OSDP readers, and Assa Abloy Aperio™ Wireless Lock. Supports Kone, Schindler, Mitsubishi & Hitachi elevator DCS & DOP integration through Armatura -One Security Platform & provides RESTful based API for 3rd Party integration.

Cyber Security

OSDP V2.2 communication over RS-485 with Advanced Encryption Standard (AES) 128-bit encryption between readers and I/O expansion boards to AHSC-1000 Security Core.

AES256 / TLS 1.2 communication between Armatura-One server and edge devices through TCP/IP.

Communication between the Armatura-One server and web-client is protected by HTTPS / TLS1.2 (AES256) or above.

An additional crypto chip (Certified EAL6+ standard) provides an enhanced cybersecurity level, providing dedicated storage and cryptographic functionality for the AHSC-1000 controller.

Supports IP/Mac address filtering functions and VLAN isolation to enhance cybersecurity standards.

Port Failover (TCP/IP coming soon) & Redundancy

The AHSC-1000 controller has dual Ethernet ports. If the primary communication circuit fails, the controller can automatically fail over to the secondary port (the controller has separate network address configurations set for both ports). 100 Base-TX Ethernet data transfer is included on the AHSC-1000 controller, allowing users to take full advantage of this high-speed network technology. Two out of three onboard RS-485 ports are dedicated and configurable for redundancy failover. The door units / IO expansion boards / readers connected with RS-485 can failover to the secondary port if the current port is disconnected.

Intelligent Power Monitoring

The AHSC-1000 supports flexible voltage inputs (9V-24V with automatic voltage detection) with multiple power supply options including PSU, board-only and Power Over Ethernet (PoE IEEE 802.3at).

The AHSC-1000 onboard intelligent power monitoring system can precisely monitor onboard battery power supply, onboard battery health, PoE power supply status & PSU power supply status. It also displays real-time power status on the webserver dashboard, ensuring administrators have clear indicators for troubleshooting.

Dimensions of Core Controller

AHSC-1000

General Information

| | |
|--------------------------------|--|
| Primary Power | PoE 802.3at / 9 - 24 VDC ± 20%, 550 mA maximum (reader current not included) |
| Primary Host Communication | Ethernet: 100Base-TX 256bit AES* symmetric encryption for Controller to Server and Inter-Controller communications |
| Secondary Host Communication | Bluetooth 5.2 |
| Third Host Communication | Wi-Fi IEEE 802.11ac 5GHz, or 2.4GHz/5GHz IEEE 802.11n 256bit AES* symmetric encryption for Controller to Server and Inter-Controller communications |
| Ethernet network connection | Port 1: Ethernet: 100Base-TX Port 2: Ethernet: 100Base-TX (Configurable for Port Failover) |
| RS-485 connection | Port 1: Armatura RS-485 / OSDP V2.2 Port 2: Armatura RS-485 / OSDP V2.2 Port 3: Armatura RS-485 / OSDP V2.2 (Configurable for Port Redundancy dedicated on port 2 & 3) |
| Number of Ports | 2*TCP/IP (IPv4 & IPv6) 3*RS-485 2*Wiegand 1*RS-232 |
| Inputs | 4 states supervision, resistor values (5% tolerance), Normally open contact: use 1.2k, 2.2k, 4.7k or 10k Normally closed contact: use 1.2k, 2.2k, 4.7k or 10k Dedicated Panel Tamper IO Input* Dedicated Microchip Control Fire Alarm IO Input & REX Input for catastrophic situation |
| Outputs | 1 relay, 1* Form-C with dry contacts |
| Normally Open Contact Rating | 5A @ 30Vdc resistive |
| Normally Closed Contact Rating | 5A @ 30Vdc resistive |
| On-Board Monitor | Size: 2.4", Resolution: 320*240, TFT Monitor Quickly view status of board, connected doors and for configuration information display |
| On-Board Webservice | Webserver for System Configuration and Management Dashboard for Controller Status Monitoring, Device Connection Status Monitoring & Configuration, Performance Status, Server Primary Controller Setting, Network Status Monitoring & Setting, IP Access Filter, SSL / TLS Certificates Setting, Access Log Export, Controller Reset, Debug Status Monitoring, Operation Log Monitoring, User Management, Date & Time Setting, Daylight Saving Time Setting, NTP Server Setting, General Status, Controller Information |

| | |
|---------------------------------|---|
| RFID Card Capacity | As a Main-Controller: 800,000 (Storage) As a Door Unit: 400,000 (1:N) / 800,000 (1:1) |
| Maximum RFID Card Number Length | Supported up to 256-bits card number length |
| Mobile Credential Capacity | 400,000 (1:N) (Bluetooth) 400,000 (1:N) (NFC) 400,000 (1:N) (Dynamic QR Code) |
| Fingerprint Capacity | As a Primary Controller: 100,000 (Storage) As a Door Unit: 50,000 (1:N) / 100,000 (1:1) |
| Face Capacity | As a Primary Controller: 100,000 (Storage) As a Door Unit: 5,000 (1:N) / 100,000 (1:1) |
| Palm Capacity | As a Primary Controller: 5,000 (Storage) As a Door Unit: 3,000 (1:N) / 5,000 (1:1) |
| Transaction Buffer | 5,000,000 Events |
| Access Level | 100,000 Levels |
| On-Board Access Point Control | 1 access point on board |
| On-Board Reader Support | 2 (OSDP over RS-485) or 2 (Wiegand) with on-board IO |
| Maximum Access Points | 129 (with 32pcs AHDU-1460 modules through TCP/IP connection) 97 (with 24pcs AHDU-1460 modules through Armatura RS-485 over RS-485 connection) |
| Maximum Readers | 258 (with 32pcs AHDU-1460 modules through TCP/IP connection) 194 (with 24pcs AHDU-1460 modules through Armatura RS-485 over RS-485 connection) |
| Maximum Inputs | 12,801 (with 33pcs AHDU-1460 modules through TCP/IP connection + 792pcs AHEB-1602 IO Expansion Board through OSDP over RS-485 connection) |
| Maximum Outputs | 12,801 (with 33pcs AHDU-1460 modules through TCP/IP connection + 792pcs AHHEB-0216 IO Expansion Board through OSDP over RS-485 connection) |
| Maximum IO Board | 24pcs (2*High Speed RS-485 communication) |
| Maximum DU Modules | 32pcs (1*TCP/IP communication with AES-256 & TLS1.2 end to end secure channel) 24pcs (OSDP over RS-485 communication with AES-128 end to end secure channel) |

Door Unit Controller Interface

| | |
|-----------------------|--|
| Input Voltage | 12 -24 Vdc +/- 10% regulated, 500 mA maximum each reader |
| Maximum Input Current | 12 -24 Vdc +/- 10% regulated, 500 mA maximum each reader |
| TCP/IP Mode | Ethernet: 100Base-TX |
| TCP/IP Protocol | 802.1X, VLAN, SSH, IPv4, IPv6, WebSocket |
| TCP/IP Encryption | Complied up to TLS1.2, AES-256 end to end secured communication channel |
| TCP/IP Communication | Spada Protocol over WebSocket |
| RS-485 Protocol | AES-256, Armatura RS-485 Secure Channel |
| Armatura RS-485 Mode | 9600-115200 bps, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. |
| Data Inputs | TCP/IP standard supported. Maximum TCP/IP cable length: 330ft. (100m) RS-485 standard supported. Maximum RS-485 cable length: 3937ft. (1200m) |

RFID / Biometrics Reader Interface

| | |
|-------------------------|---|
| Input Voltage | 12 -24 Vdc +/- 10% regulated, 500 mA maximum each reader |
| Maximum Input Current | 12 -24 Vdc +/- 10% regulated, 500 mA maximum each reader |
| RS-485 Protocol | AES-128, OSDP Secure Channel |
| OSDP Mode | 9600-115200 bps, OSDP V2.2, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. 3rd Party reader: support OSDP V2.2 or above |
| Wiegand | Read: support up to 128 bits / Write: Support 26 / 34 / 37 bit, and other customised card formats |
| Tamper Input (Wiegand) | TTL levels, high > 3 V, low < 0.5 V, 5 mA source/sink maximum |
| Buzzer Output (Wiegand) | TTL levels, high > 3 V, low < 0.5 V, 5 mA source/sink maximum |
| LED Output (Wiegand) | TTL levels, high > 3 V, low < 0.5 V, 5 mA source/sink maximum |
| Data Inputs | RS-485, OSDP and Wiegand standards supported. Maximum RS-485 /OSDP cable length: 3937ft. (1200m) Maximum Wiegand cable length: 328ft (100m) |

IO Expansion Board Interface

| | |
|-----------------|--|
| RS-485 Protocol | TLS 1.2, AES-128, OSDP V2.2 Secure Channel |
| OSDP Mode | 9600-115200 bps, OSDP V2.2, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. Maximum cable length: 2,000 ft. (609.6m) |
| Data Inputs | OSDP and Wiegand standards supported. Maximum cable length: 500 ft. (152m) |

Software Interface

| | |
|----------------------|---|
| TCP/IP Mode | Ethernet: 100Base-TX |
| TCP/IP Protocol | NTP, SNMP V2 /V3, 802.1X, vLan, SSH, MQTT, IPv4, IPv6, DNS, DDNS |
| TCP/IP Encryption | Complied up to TLS1.2, AES-256 end to end secured communication channel |
| TCP/IP Communication | Spada Protocol over MQTT |

Cable Requirement

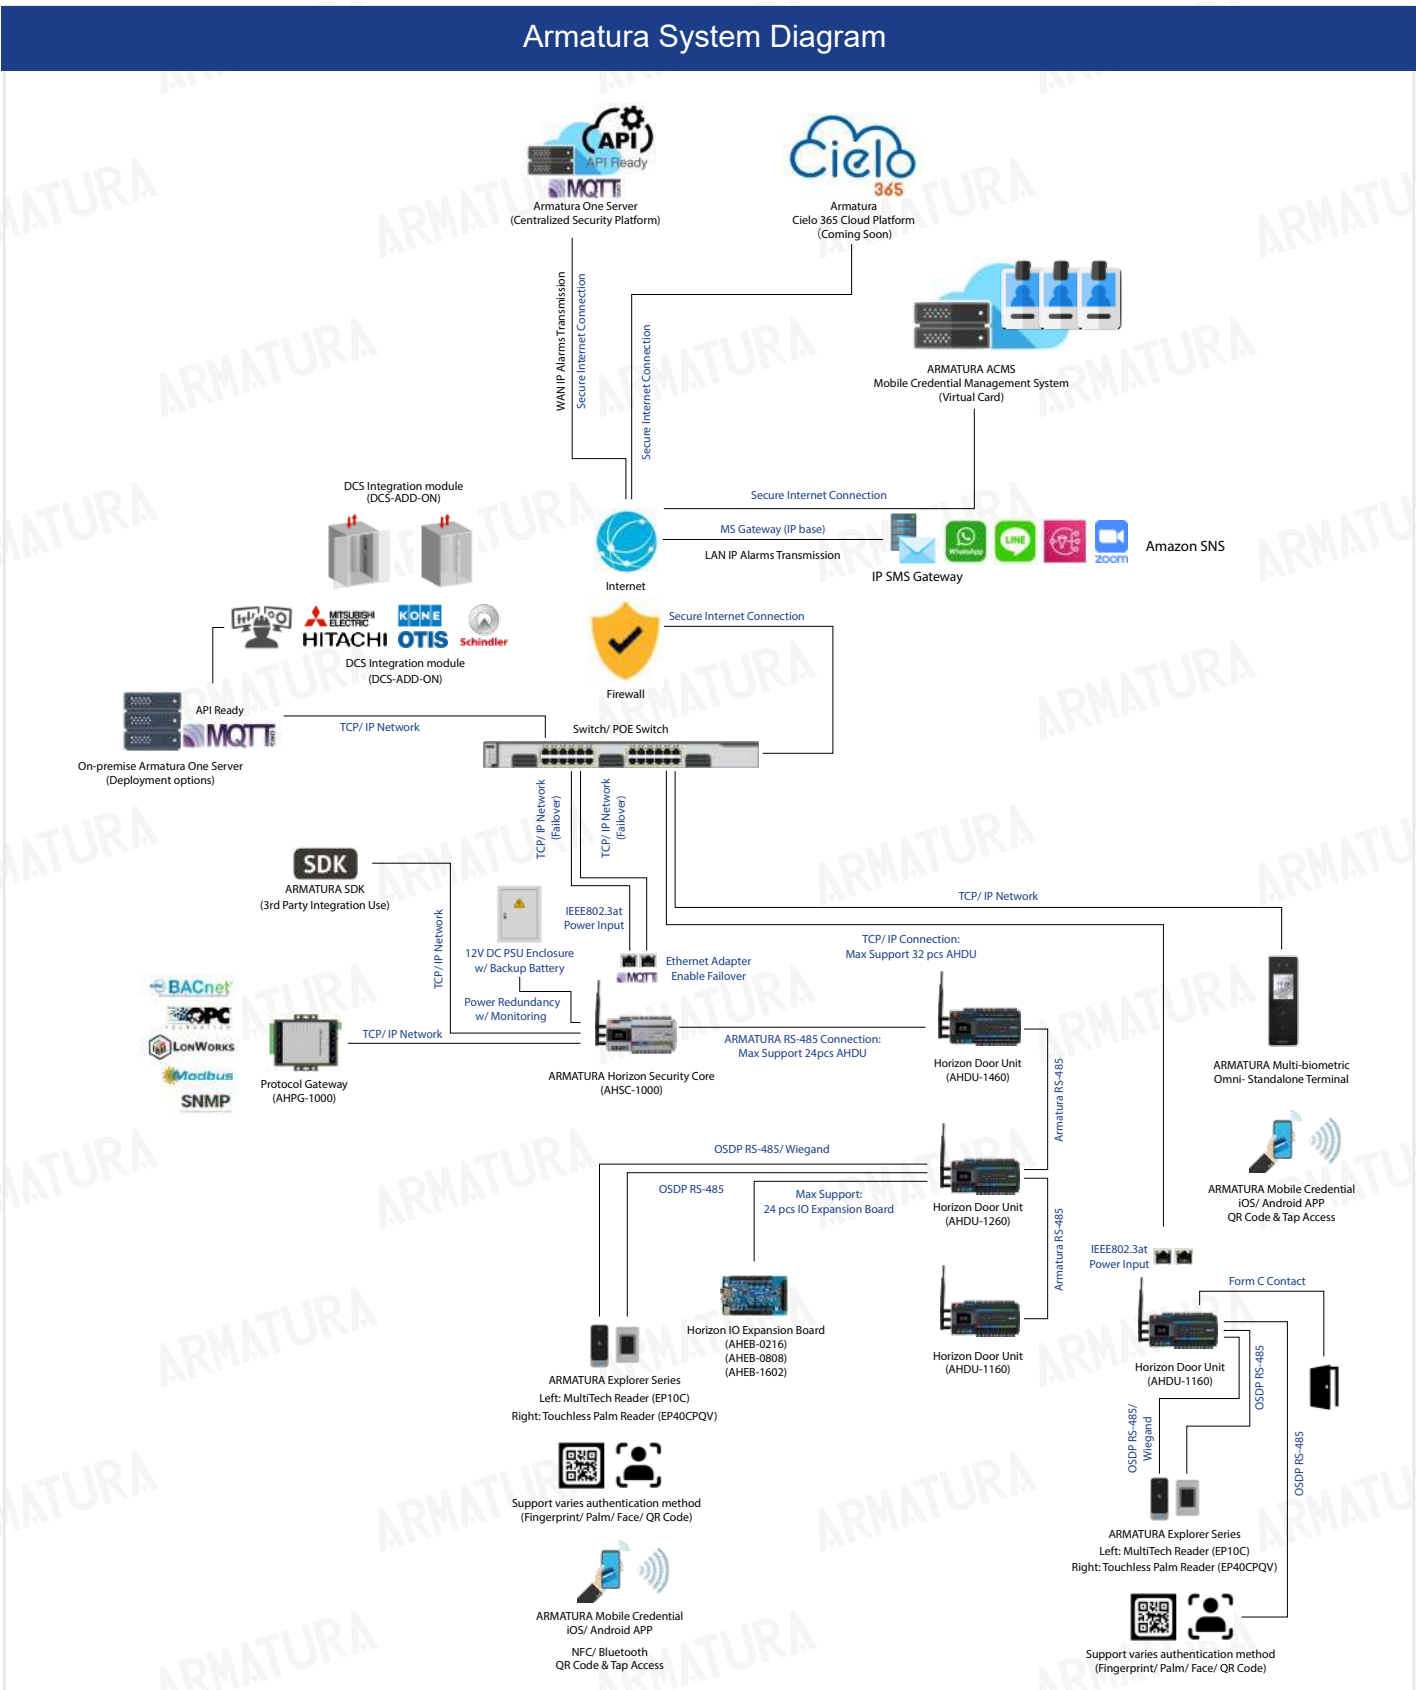

| | |
|------------------------|--|
| Power & Relays | One twisted pair, 18-16 AWG |
| Ethernet | CAT-5, minimum 330 ft. (100m) |
| Ethernet Failover Port | CAT-5, minimum 330 ft. (100m) |
| RS-485 Reader Port | 9600-115200 bps, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. One twisted pair with drain wire and shield, 120 ohm resistance, 22-18 AWG, Maximum cable length: 3937ft (1200m) |
| RS-485 I/O Device Port | 9600-115200 bps, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. One twisted pair with drain wire and shield, 120 ohm resistance, 22-18 AWG, Maximum cable length: 3937ft (1200m) |
| RS-485 Failover Port | 9600-115200 bps, asynchronous, half-duplex, 1 start bit, 8 data bits, and 1 stop bit. One twisted pair with drain wire and shield, 120 ohm resistance, 22-18 AWG, Maximum cable length: 3937ft (1200m) |
| Wiegand Port | 20 AWG shielded Wiegand wire ,328ft. (100m) |

| Mechanical | |
|------------------|---|
| Dimensions | 4.8" W x 10.2" L x 2.5" H in. (122 x 260 x 62.5mm) |
| Weight | approx. 30oz (830g) |
| Mounting | Supported DIN35 Rail Compatible with UTA89 Din Rail Adapter for screwing on switchgear (Sold Separately) Wall mount |
| Housing Material | ABS-PC UL-94 V2 |

| Environmental | |
|-----------------|---|
| Temperature | -22°F ~ 158°F (-30°C~70°C), Operating & Storage |
| Humidity | 0-95%RHNC |
| Certifications* | Certification: CE, FCC, RoHS, UL294 |
| Security Rating | Secure Data Storage in EAL 6+ Certified Crypto Chip |

| Software | |
|--------------------|-------------------------------|
| Supported Software | Armatura--One Security System |
