

## Explorer Series - EP20C / CK / CQ / CKQ

### All Weather Outdoor Multi-tech Smart Reader

- Designed for Advanced Security
- Supports Over 100 RFID Credential Types
- Touch Keypad / QR Code Scanner

#### Compact RFID Reader with Touch Keypad

The EP20 reader series is one of the most compact multi-tech RFID readers in the market, which supports over 100 RFID card types and both mobile NFC and Bluetooth (Low Energy) and is suited for most installation environments. Embedded touch keypad enables passwords as an authentication option for users to best suit their needs.

#### Multi-tech RFID & Mobile Credential

Supports over 100 RFID card types in standard package with various optional RFID modules that cover up to over 10 extra advanced secured RFID protocols, which almost cover most of the end-user requests, enabling high flexibility for multi-card types and mobile credentials situation.

#### Designed for Advanced Security

Secure communication: OSDP (v2.2 Secure Channel) over RS-485 communication between EP20 series readers and control panels. Complies with AES-128 standards to prevent against interleaving and replay attacks. Complies with AES256 encryption standards between mobile (NFC / Bluetooth) and reader communication.

Secured Data Storage: Certified EAL6+ encryption chips to enhance data protection performance to the final grading security level.

#### IP68 Water & Dustproof Protection Level

Certified IP68 Water & Dustproof levels represent that the readers can withstand dust, dirt and sand, and are resistant to submersion up to a maximum depth of 3.3ft/ 1.5m underwater for up to thirty minutes.

#### IK10 Physical & Environmental Protection

Certified IK10 Vandal-proof rating enables protection from multiple attacks up to 20 joules.

#### Anti-SPA/ DPA/ EMA/ DEMA Attack

Effectively prevents external malicious attacks and protect all communication and client's data.

#### Safety Standard of UL746C (F1) and Housing Material Meets UL94-V0 Standard

Ability to work in both indoor & outdoor environments. Resistant to UV degradation. UL 94V-0 standard ensures burning combustion is not sustained for more than 10 seconds after applying controlled flame.

#### Advanced Security

The Armatura design team is dedicated to ensuring the Explorer Series reaches the highest security expectations.

Explorer Series readers support 4 mobile identification modes when used with the Armatura ID mobile app.

#### Card Mode

Present your smartphone to the reader like an access card

#### Remote Mode

Verify on the reader by clicking a button in the Armatura ID app

#### QR Code Mode

Present your QR Code and get access

#### Express Mode

Activated and paired up with reader for fully automated door access

## Key Features

### Mobile Credential Capability

The Armatura ID mobile app offers a consistent user experience across iOS & Android platforms. Opening doors by presenting your smartphone to the reader or scanning a QR code. Use your phone's Face & TouchID functions for even more secure authentication. It supports both NFC and Bluetooth communication methods, extending mobile access functions to almost all smartphone users.

### Compact Design with Touch Keypad & QR Code Scanner as options

Compatible with single gang, European and Asian style boxes suit most interior designs. Optional touch keypad for password authentication. QR code scanner for static/dynamic QR code recognition.

### Enhanced Security

Supporting Open Supervised Device Protocol (OSDP) guarantees secured communication between the control panels and readers. Advanced-Data protection using certified crypto chips with EAL6+ certified. AES128 end-to-end encryption between the control panel and reader, ensuring all communications are secure.

### Ultimate Protection (IP68 & IK10 & UL94-V0)

IK10 Vandal-proof and IP68 Water & Dustproof protection levels enable operation under any installation environment. IK10 vandal-proof protection level enhances protection ability against malicious physical attacks. -30°C to 70°C / -22°F - 158°F operating temperature enables operation under extreme weather conditions. UL 94V-0 standards for flammability ensures burning combustion is not sustained for more than 10 seconds after applying a controlled flame.

### Supports Multi-tech Reading

Supports 125 kHz, 13.56 MHz and 2.4GHz frequency credentials. Supports 100+ card types, covering most of the common card formats in the market.

**Remarks:**

\*\*Standard version provides "Read only" function. Customization is required for "Read & Write" function.

\*This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>)

QR scanning performance was resulted in a laboratory testing environment, the luminance was recorded as 250 Lux
