

#### Advanced Time & Attendance and Access Control Software

ZKTime Enterprise is an advanced T&A application for ZKTeco terminals that allows to manage all In/Out attendance and access records, controlling all kind of attendance events (breakfast, lunch, medical, personal business, smoke etc..), accrued balance and payroll methods. Match and process punches automatically after downloading from terminals, warning about odd number punches or days in a special case, facilitating and speeding up the work of attendance management. Therefore, it includes an access control module, where you will be able to define different access time slots and days for each employee.

It can operate together with ZKTeco's web staff portal **Atalaya 2**.

Includes private calendar and profile (round hours, interruptions, payroll, etc..) as well as flexible work timetables. It can store fingerprints and faces of employees for recognition in biometric terminals. Imports employees from CSV.

# 🕓 Workday

Supports both diurnal, nightly, rotating and flexible shifts. Allows valuations of payroll per shift, mandatory attendance times, periods of validity of events and support for workdays over 24 hours.

Supports punch roundings, automatic breaks and automatic events. It is now possible to list the people who exceed the time or the time allowed for an event.

Manages different payroll concepts such us regular hours, overtime, extra holidays, and so on. Payroll can compensate according to a predetermined amount of time or employee duty time.

## Atalaya 2

#### Web Staff Portal for ZKTime Enterprise

**Atalaya 2** is a web application through which employees or managers can view and print punches, credit hours, payroll, etc. It allows users to make individual requests or petitions to create or modify attendance checks, ask for private calendar changes as vacations or modify personal data.

All this can be managed through the web browser, (IE, Mozilla, Opera, Chrome) which is directly connected to ZKTime Enterprise EU, whereby there is no need to install any other software application in the user's PC.
